ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the year ended December 31, 2021

VPI CANADIAN EQUITY POOL

Annual Management Discussion of Fund Performance

March 21, 2022

Investment Objective and Strategies

The investment objective of the Pool is to generate longer term growth in value through the increase in the value of its holdings, and through the receipt and reinvestment of dividend income from its holdings by investing primarily in equity securities of Canadian companies. The Pool may invest in securities outside of Canada and has the flexibility to invest up to 49% of its assets in non-Canadian securities.

The Portfolio Manager strongly favours high quality common shares of very large and stable companies where profits and dividends are likely to grow significantly and, more importantly, have less chance of a significant decrease in value. This preservation of capital is pursued by focusing on companies with very strong balance sheet positions and strong competitive positions, such as being a leader in a particular market or industry. The Portfolio Manager utilizes fundamental analysis as the primary basis for security selection and makes every effort to avoid overpaying for selected stocks.

Risk

Overall, the risks associated with investing in the Pool have not materially changed and remain as discussed in the Prospectus. The Pool is considered suitable for investors with a medium tolerance for risk.

North American and international economies experienced volatile and uneven recoveries from the economic consequences of the COVID-19 pandemic with many still below pre-pandemic levels. Government and business restrictions as well as the health of the workforce continued to negatively impact the business environment with supply chain and labour force disruptions. The historic economic stimulus to support the economy and consumers has created substantial increases in inflation, enhancing another risk for businesses, consumers, and investors. To minimize further inflationary pressures, central banks in Canada and the United States have indicated they will begin increasing benchmark interest rates. A rapidly increasing interest rate environment may cause further uncertainty in economic growth, market valuations, and consumer spending. These factors in aggregate have and may continue to cause heightened levels of volatility in equity and currency markets over the short-term.

Results of Operations

Net assets of the Pool increased by approximately \$198.5 million for the year ended December 31, 2021 due to a \$258.6 million increase in net assets from operations, offset by \$29.2 million of distributions to unitholders and \$30.9 million of net redemptions. The increase in net assets from operations was due to \$33.0 million of dividend and interest income, \$73.1 million of net realized gains on the sale of investments, \$1.8 million of foreign exchange gains on cash and \$173.0 million of unrealized appreciation in the value of investments. This was offset by \$22.3 million of management fees and operating expenses.

Results of Operations (continued)

There were a few changes made to the Pool's equity holdings during the year. The following table summarizes the businesses that were added and/or removed from the portfolio:

<i>Additions</i>	<i>Dispositions</i>
Electronic Arts	Honeywell International
Lockheed Martin	Wells Fargo

As a result of these decisions during the year, additions/trimming of existing holdings and changes in market values during the period, there were some shifts in the portfolio allocation from the beginning of the year as indicated in the following table:

<i>Sector</i>	<i>Increase</i>	<i>Sector</i>	<i>Decrease</i>
Media & Entertainment	5.1%	Banks	8.3%
Capital Goods	2.9%	Semiconductors & Equipment	3.4%
Transportation	2.1%	Automobiles and Components	1.2%
Cash	1.7%	Software & Services	0.9%
Pharmaceuticals & Biotechnology	1.1%		
Communication Services	0.9%		

Each series of the Pool experienced a gain in the range of 23.7% to 26.1% relative to the 25.1% gain of the S&P/TSX Composite Total Return Index (the "Index").

The strongest contributor to the Pool's performance were its financial holdings which were largely offset by the absence of energy holdings which were a strong contributor to the Index during the year. Of the Pool's 20 holdings, 17 had positive contributions to performance.

Revenues and Expenses

Revenues of the Pool for the year included \$33.0 million of dividend and interest income and \$1.8 million of foreign exchange gains on cash. These were offset by management fees and operating expenses of \$22.3 million during the year.

The realized gain on sale of investments of \$73.1 million is attributable to two completed dispositions as well as partial dispositions of shares from the portfolio during the year. Dividends received from each of these holdings while in the Pool are in addition to these gains.

Holding	Approximate Holding Period	Proceeds (millions \$)	Cost (millions \$)	Realized Gain (millions \$)
Honeywell International	0.9 years	29.3	17.7	11.6
Wells Fargo	5.2 years	80.1	78.8	1.3
Partial Dispositions	n/a	234.0	173.8	60.2
		343.4	270.3	73.1

Recent Developments

Economic Conditions

The business environment remains volatile and uncertain as the pandemic continues to transition to an endemic. During 2021, the unemployment rate in Canada fell from 8.8% to 6.0% and the Canadian Consumer Price Index increased from 0.7% to 4.8% by year-end. The unprecedented level of Government stimulus is expected to be tapered to offset the risks of continued increases in inflation. As a result, the 10-year Government of Canada yield increased from 0.72% to 1.48% by year-end. As the economy continues to grow and inflation rates continue to move higher, central banks continue to indicate that interest rates will be moving higher in the near term. This has led the Portfolio Manager to believe there are good opportunities available in several industries, however caution is essential at this time given the higher-than-average levels of valuation risks and volatile economic conditions. The Portfolio Manager continues to seek opportunities that meet the Pool's investment criteria.

As at the time of this report, there is currently a heightened degree of risk related to the military conflict between Russia and the Ukraine. The Russian invasion has created significant uncertainty for the markets, interest rates, globalization, and future government spending. As a result of the conflict, some of the Pool's holdings could be negatively impacted in the short-term. Overall, the Portfolio Manager believes the direct impacts from this situation on the businesses owned within the Pool will be minimal, but there are indirect implications that one must be aware of. Given the quickly evolving situation, the Portfolio Manager will continue to monitor the conflict and the potential impacts to the securities held within the Pool.

The above summary of investment portfolio may change due to ongoing portfolio transactions of the Pool. An update will be made available within 60 days of each subsequent quarter-end.

Past Performance

The historical performance information shown below assumes that all distributions were reinvested in the Pool and does not account for any sales, redemptions, distributions or optional charges or income taxes payable by an investor that would have reduced returns. Mutual fund returns are not guaranteed, their values change frequently, and past performance may not be repeated.

Year-by-Year Returns

The bar charts below show the performance of each series of the Pool (net of fees) for the year ended December 31, 2021, and for previous years ended December 31 or since inception to December 31. It shows in percentage terms, how an investment made on January 1 or on inception would have increased or decreased by the end of the respective periods.

Series A

Series F

Series O

(1) Value Partners Investments Inc. assumed the portfolio management responsibilities of the Pool on January 5, 2015.
 (2) 2017 return is since inception on July 5, 2017.

Annual Compound Returns

The following table shows the annual compound total return of each series of the Pool compared to the S&P/TSX Composite Index for the periods shown ended December 31, 2021. All index returns are calculated on a total return basis, meaning that performance was calculated under the assumption that all distributions were reinvested.

	10 Year	5 Year	3 Year	1 Year	Since Inception ⁽²⁾
Series A ⁽¹⁾⁽³⁾ (Inception: October 20, 2005)	9.3%	7.3%	10.6%	23.7%	6.9%
S&P/TSX Composite Index	9.2%	10.0%	17.5%	25.1%	7.7%
Series F ⁽¹⁾⁽³⁾ (Inception: July 3, 2007)	10.4%	8.2%	11.7%	24.9%	7.0%
S&P/TSX Composite Index	9.2%	10.0%	17.5%	25.1%	6.0%
Series O ⁽¹⁾⁽³⁾ (Inception: July 5, 2017)	n/a	n/a	12.8%	26.1%	9.9%
S&P/TSX Composite Index	n/a	n/a	17.5%	25.1%	11.0%

(1) The percentage return differs for each series because the management fee rate and expenses differ for each series.

(2) The return since inception for each series will differ when the inception date differs.

(3) Value Partners Investments Inc. assumed the portfolio management responsibilities of the Pool on January 5, 2015.

The S&P/TSX Composite Index is a broad market indicator of activity for the Canadian equity market. Size and liquidity are among the key criteria for inclusion in the index, with size being assessed on a float market capitalization basis and liquidity being measured relative to liquidity thresholds.

Management Fees

The Pool pays an annual management fee on each of its series (excluding Series O) to Value Partners Investments Inc. ("the Manager"). The management fee is calculated daily as a percentage of the net asset value of each series as of the close of business on each business day. In consideration for the management fees, the Manager may pay a percentage sales commission and/or trailing commission to registered dealers or brokers for units bought and held in the Pool depending on which series of units were purchased.

For the year ended December 31, 2021, approximately 41% of the management fee revenues received by the Manager from the Pool were paid to registered dealers and brokers as sales and/or trailing commissions. Since each series may have a different commission structure, this percentage may vary by series. For unitholders eligible for the Management Fee Reduction Program, approximately 17% of the gross management fees were returned to unitholders as management fee rebates. The remainder of the management fee revenue was retained by the Manager for corporate purposes.

Related Party Transactions

Value Partners Investments Inc. is the Manager of the Pool and is responsible for the overall business and operations of the Pool. For the year ended December 31, 2021, the Pool paid \$18.6 million in management fees (excluding taxes) to the Manager. In addition, the Manager or parent company of the Manager also held 32,010 Series F units as of December 31, 2021.

Financial Highlights

The following tables show selected key financial information about each series of the Pool and are intended to help you understand the Pool's financial performance for the past five years ended December 31. This information is derived from the Pool's audited annual financial statements and is not intended to be a reconciliation of the net asset value per unit.

The Pool's Net Assets Per Unit (\$) ⁽¹⁾

Net asset value per unit ⁽¹⁾	\$13.01	\$10.72	\$11.18	\$10.07	\$10.84

(1) This information is provided as at the date shown.

(2) Management expense ratio is based on total expenses for the stated period (excluding distributions, commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets during the period. In the period a series is established, the management expense ratio is annualized from the date of inception to December 31.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

(4) The Pool's portfolio turnover rate indicates how actively the Pool's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Pool buying and selling all of the securities in its portfolio once in the course of the year. The higher the Pool's portfolio turnover rate in a year, the greater the trading costs payable by the Pool in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Pool.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the year ended December 31, 2021

VPI CANADIAN EQUITY POOL

Other Information

Value Partners Group Inc. (VPGI) owns 100% of Value Partners Investments Inc. (VPI) and LP Financial Planning Services Ltd. (LP Financial), a mutual fund dealer. VPGI is 37.4% owned by Longton Ltd., whose shareholders include specified members of the Lawton family, including Paul and Sean Lawton. Paul Lawton is an officer of VPGI as well as a director and officer of both VPI and LP Financial. Sean Lawton is a director and sales representative of LP Financial.

As of December 31, 2021, sales representatives of LP Financial held, in aggregate, Class A1 shares representing 19.0% and Class C1 shares representing 4.7% of the common equity of VPGI. The remaining common equity of VPGI was held by sales representatives of other dealer firms and employees of VPGI, VPI and LP Financial. No other sales representative held more than 5 percent of the common equity of VPGI. Additional information regarding equity interests may be obtained from the Pool's annual information form or from the Manager's website at <http://www.valuepartnersinvestments.ca>.

Forward-Looking Statements

This report may contain forward-looking statements about the Pool, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", or negative versions thereof and similar expressions. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Pool action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Pool and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Pool. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

We stress that the above-mentioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Pool has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.
